

Do you want to reduce telephony cost across your organisation? Do you want to increase telephony capabilities and get greater flexibility and control?

Then you are ready to switch off the traditional ISDN network

WE WILL BE HAPPY TO DISCUSS WHICH SOLUTION IS BEST SUITED FOR YOUR BUSINESS

WHY IS THIS HAPPENING?

ISDN is a declining technology, BT intend to phase it out as soon as possible...

Meaning many businesses will need to move to next generation technology, such as SIP Trunks or Hosted Telephony. Both are flexible, cost effective solutions and alternatives to ISDN. RTF Networks can help you make the right decision for your business and the upcoming changes it will face.

WHAT ARE YOUR OPTIONS?

OPTION 1: HORIZON

Move your Telephone System to the Cloud:

- Save money on all call costs and line rental
- Disaster Recovery
- Manage everything from a Web Based Portal
- Call Queuing
- Manage your own calls and resilience
- Out of Hours Technical Support

OPTION 2: SIP TRUNKS

Direct replacement for your ISDN Estate:

- Save money on call costs and line rental
- No Limitation on channels
- Built in Business Continuity
- Compatible with Skype for Business
- Out of Hours Technical Support
